# SUB8

The Sub8 is a small yet powerful subwoofer designed to extend the low frequency capabilities of any nearfield monitoring system down to 30 Hz.

It houses a robust 8.5" woofer with a 1.5" voice coil driven by a 160 W ICE power amplifier. This amp combines low heat generation with high performance to handle maximum power levels, even during long mix sessions.

## Individual settings

The front baffle features two motorized knobs that let you tailor input level and crossover frequency settings. These settings can also be controlled via the included wireless remote, allowing you to optimize your sound reproduction from your ideal listening position. with accuracy and realism.

## Basic technical data

- 8.5" Subwoofer
- Amp. Power RMS / Music:  
160 W / 240 W
- 28 Hz - 150 Hz
- Max. peak SPL at 1 m:  $\geq 110$  dB
- Remote Control
- 5 Year Warranty

## Reviews & Testimonials

The Sub8 grooves really nicely with the F7, serving up a classy, "expensive" sound. With the subwoofer doing its work, the F7 satellites really get a chance to push the center image forward in a present, but never brash way.

**[Scott McChane / TAPE OP]**

Saying that ADAM Audio's Sub8 is anything but impressive would be an understatement. [...] It works great with just about every system, even your standard 5.1 home theater configurations.

**[GuitarFella]**

Overall, I have not a single complaint with the Adam Sub 8 its priced accordingly and you get what you pay for anyways so its well worth the investment. I never really realized how much a difference a good quality sub would make until I started using these.
