

Key Features:

- ▶ 12" woofer
- ▶ 1" polymer diaphragm compression driver
- ▶ Compact and low-profile for minimal obstruction of audience sight-lines
- ▶ 90° x 50° coverage for even and smooth response on and off axis
- ▶ Dual-angle pole socket for applications requiring tripod mounting
- ▶ Heavy Duty 16-gauge protective screen-backed steel grille
- ▶ Tough DuraFlex™ enclosure finish

Applications:

- ▶ Speech reinforcement
- ▶ Live performance stage monitoring
- ▶ Reinforcement of vocal and acoustic music
- ▶ High-performance satellite speaker for use with subwoofers

The PRX412M is a premium, utility/monitor speaker. The PRX412M uses a 305 mm (12 in) woofer and a 2414H-C 25 mm (1 in) polymer diaphragm compression driver for 300 watts (continuous) power capacity. A 90° x 50° horn provides smooth, even coverage whether used in the vertical (mains) or horizontal (monitor) orientation.

NL-2 and ¼" phone combination connectors are provided. A passive network provides accurate reproduction throughout the cross-over region.

For use on a tripod or over a subwoofer, JBL's dual angle pole mount is included. This feature allows the speaker to be mounted in a vertical position or with a 10° down tilt for optimum audience coverage.

The enclosure is constructed of birch/poplar multi-laminate hardwood and coated in JBL's rugged DuraFlex™ finish. The distinctive 16-gauge steel grille is CNC-machined for precision. The grilles are internally lined with an acoustically transparent screen to provide additional driver protection and give a very professional appearance.

JBL continually engages in research related to product improvement. Some materials, production methods and design refinements are introduced into existing products without notice as a routine expression of that philosophy. For this reason, any current JBL product may differ in some respect from its published description, but will always equal or exceed the original design specifications unless otherwise stated.
