Acryl it RPM 1 Carbon
 SRP
169,00 €

MATERIAL	acrylic with satined surface
DIAMETER	300 mm
HEIGHT	27 mm
WEIGHT	2,35 kg net

Functional and easy to use sound improvement!

Upgrade your *RPM 1 Carbon* turntable with *Acryl it RPM 1 Carbon*. *Acryl it RPM 1 Carbon* is made from acrylic with satinised surface and brings a more liquid sound that leaves no space for platter resonances.

The change is easily made: just exchange your MDF platter for *Acryl it RPM 1 Carbon*, with built-in inverted bearing housing. Unlike many platters, where you will need to place a felt mat between record and platter to damp resonances, you can put your record directly on the acrylic surface, with nothing in-between.

Acryl it RPM 1 Carbon is able to improve overall performance significantly and will additionally upvalue your turntable optically!
